

MAGNI 536

## MAGNI 536 FASTENER COATING

Magni 536 is a duplex coating that combines electroplated zinc and hex-chrome-free passivated substrate with a chrome-free, aluminum/nickel-rich topcoat. Engineered for use on fasteners, including nuts, bolts and other hardware, Magni 536 contains metallic pigments that mitigate galvanic corrosion activity when coated fasteners are assembled into aluminum or stainless steel. Magni 536 is applied via dip-spin or spray application methods.

### PERFORMANCE DATA\*:

Coating thickness	5-8microns (topcoat) over 8-10 microns zinc plate (basecoat)
Coefficient of friction WZ101:	0.20 ± 0.03
Color	Silver
Salt spray ASTM B117:	1,000 hours

### OEM SPECIFICATIONS:

Delphi Fisher Valve	DX 551250 FFS6B1 REVN
------------------------	--------------------------

\*Typical Values - refer to OEM Specifications and Magni Application Guidelines for official specifications
